Program Title: Training Community Outreach Providers to Increase Access to Safe Births in two remote rural areas of Nepal.

Objectives: The Primary outcomes are training Community Health Workers to be the first responders for maternal and child health. Training will focus on:

Birth Preparedness Package (BPP)

Community Based Newborn Care (CBNCP)

The Infection Prevention Package (IP)

Community Outreach Program

Grant will fund: Stipends for the 600 Female Community Health Volunteers (FCHVs). This includes both the original training and a refresher training the following year.

Direct Reach: 600 works to be trained

Indirect Reach: 24,645 women and girls could be served.
