

Options for Accessing the Monthly Grantee Videos

Each month, Together Women Rise provides comprehensive learning materials about the challenges faced by women and girls globally, and the solutions that we are funding. This includes videos provided by our Featured Grantees.

Effective July 1st, we will no longer be mailing out quarterly DVDs to chapters. All grantee videos will be accessible online via Together Women Rise's [website](#) and our [YouTube channel](#).

Here are some simple instructions to help you make the switch:

Using Your Smart TV - Open the YouTube app on your TV and search for Together Women Rise to find our [channel](#). When you get to the main page for our channel, be sure to “subscribe” by clicking the button on the right hand side of the screen. This will make it easier to find next time. On our YouTube channel, you can find all the monthly chapter videos along with the [Conversations with Grantees](#), the recordings of our monthly [national webinars](#), [book club discussions](#), and other special events.

Using Your Laptop - If you do not have a Smart TV, another option is to connect a laptop to your TV. Every TV and laptop is different, but typically you will need an HDMI cable to connect these devices. Once connected, just use your laptop to go online to RISE's YouTube channel as described above.

Download the Video to your Own Device - On each Featured Grantee page on our website, there is an option for you to download an MP4 file of that month's video to your own device. This is a great option if you will not have Internet access where your chapter meets. You can just show the video right from your laptop or tablet.

Ask Members to Watch Video Before the Meeting - Some chapters ask your members to watch the video prior to their chapter meeting. Members can watch the video on their own device, at home and at their convenience, saving more time for discussion at your chapter meeting.

We are here to help!
